Press Release

New Federal Incentives Available for Doctors

Davison, MI October 15, 2010: On July 13, 2010, the final rule was released that details how health care providers can qualify for federal incentive payments that are part of the 2009 American Recovery and Reinvestment Act (ARRA). The earlier doctors qualify, the larger the incentive payments.

The incentives are extremely generous, but doctors must establish "meaningful use" of certified EHR technology by early 2011 to receive the maximum benefits.

"Colonial Valley Software has been in the medical software business from 1981. We have been at the forefront of helping doctors save time and money by simplifying their practice management and medical billing using Colonial Valley Software products. This opportunity for doctors to take advantage of brand new federal government incentive payments is really going to make a difference to our doctors and their practices" according to Patrick McQuillen, President of Colonial Valley Software in Davison, MI.

More information about this important program is available at ColonialValley.com.
